

## ABOUT ME

With over seven years of experience as a software engineer, I have developed an extensive skillset that encompasses a broad range of technologies, including Typescript, ReactJS, MongoDB, SQL, and more. As a highly skilled and knowledgeable professional in the field, I bring a wealth of expertise and experience to any project I undertake. Whether working collaboratively as part of a team or taking on individual responsibilities, I am committed to delivering exceptional results and exceeding expectations.

## EXPERIENCE

Senior Software Engineer  
Komi.io

Oct 2022 – Present

- Collaborating with product managers, designers, and other stakeholders to define requirements and scope of projects, and translate them into technical specifications and implementation plans.
- Developing and implementing technical strategies, best practices, and coding standards to ensure scalability, maintainability, and performance of web applications.

Senior Software Engineer  
Holiday Extras

May 2022 – Sept 2022

- As a key member of the payment optimization team, I led efforts to enhance the payment experience.
- Played a critical role in developing a new component library that can be used across multiple departments and functions.

PRODUCT MANAGER  
DronaHQ

Dec 2020 – July 2021

- Led the team to build the WYSIWYG App Building Products from inception to production stage.
- Drafted Feature set and Roadmap for the product based on market research and user insights.
- Bridged Technology and Business unit for efficient scaling of the technology roadmap.
- Developed the backend system with the team using technologies such as Node.js, Express, C#, MongoDB, SQL, Mongoose, and Stored Procedures.
- Designed and developed the component building engine to work with CICD.
- Built the core products with the team and handled product deliveries.
- Managed multiple client-facing as well as product team responsibilities

Senior Software Engineer  
DronaHQ

Apr 2019 – Nov 2020

- Headed the team to build image compression and optimization systems using AWS lambda functions along with URL reuse.
- Developed multiple PWAs with the team for different use cases ranging from Internal tools to data visualization.
- Design and develop software solutions to meet agreed acceptance criteria and stories using a range of languages and technologies. Ensures development standards are established, known, and followed within the agile team

**FULL STACK DEVELOPER**  
DronaHQ

July 2017 – Mar 2019

- Work majorly focuses on web development including but not limited to Front-end development, and UI framework development along with REST API development.
- Implementation of new frameworks in current modules and addition of new frameworks mentoring new developers.
- Refactoring existing features to drive up code quality and unlock future functionality.

**INTERN SOFTWARE ENGINEER**  
DronaHQ

Jan 2017 – June 2017

- Assisting in the design, development, and maintenance of web applications, under the guidance and supervision of senior engineers.
- Writing clean, efficient, and maintainable code that meets design specifications and quality standards, while also adhering to coding best practices and conventions.
- Participating in code reviews, testing, and debugging to identify and resolve technical issues and improve application performance.

## RESEARCH

### USER INTERFACE DESIGN

- UI and UX design include identifying user needs and preferences, and developing design elements that enhance usability and accessibility.
- Additionally, understanding how UI and UX impact user engagement, satisfaction, and loyalty can inform the development of successful digital products.

### USER INTERFACE DESIGN

- UI and UX design include identifying user needs and preferences, and developing design elements that enhance usability and accessibility.

## RESEARCH

**M.Sc. Computer Science**

2021 – 2022

Queen Mary university of London

**M.Sc. Computer Applications**

2014 – 2017

Mumbai University

**B.Sc. Information Technology**

2010 – 2014

Mumbai University
